

CONSTRUCTION OF OPD AT BUNYONYI HEALTH CENTER III:- RUBIRIZI DISTRICT

Health Centre Upgrade

Munyonyi health center had an old structure that was unable to contain the increasing number of patients that came to access the medical services.

The old structure at bunyonyi health center III .

The chairman of ACASD alongside other monitors visited the health center and made observations that were aired in the district dialogue. After persistent discussions, ground

breaking activities commenced and currently construction is taking place and the new structure is nearing completion. During one of the visits, the monitors again discovered that the engineer was doing substandard work, the monitors immediately got in touch with the engineer and he was able to rectify the work to the required standard.
